

## Municipal Class Environmental Assessment for Extension of Bachand Street and Stormwater Outlet

# NOTICE OF PUBLIC MEETING

**Project Information:** As part of the Gendron Street and Bachand Street assumption process, the Municipality of Bluewater initiated a Municipal Class Environmental Assessment (MCEA) to investigate impacts associated with constructing an extension of Bachand Street and a new stormwater outlet to the Fourcier Drain. The road extension is planned to extend Bachand Street westward and then north to Gendron Street. A preliminary drawing showing the proposed work is included as Figure 1.

**MCEA Process:** An MCEA is required prior to any construction as the project involves constructing a new road in an unopened road allowance. The MCEA will identify potential environmental impacts and how those impacts could be mitigated.

**Public Involvement:** The project team, consisting of staff from the Municipality of Bluewater and the project engineers, B. M. Ross and Associates, are hosting an on site public meeting to discuss the proposed road extension and stormwater outlet, take feedback and answer questions. The meeting will be held on: **Tuesday June 16 from 6:30 PM to 7:30 PM.** Meet the project team on Gendron Street at the location indicated on the included map.

For more information about MCEA Process, please contact Lisa Courtney, Environmental Planner at B. M. Ross and Associates

(lcourtney@bmross.net or 1-888-524-2641). Any personal information submitted in this process will form part of the public record and may be disclosed under the Freedom of Information and Protection of Privacy Act and the Environmental Assessment Act, if requested, to any person.

**Dave Kester,**  
Manager of Public Works, Municipality of Bluewater
